

# Dream Flex™

*“Cuts, Weeds & Heat Presses Like a Dream”*

Dream Flex™ Heat Transfer Film is a soft handed film that cuts, weeds and heat presses like a dream and is highly designed for transfer of detailed designs, logos, names and numbers onto textiles due to the high elasticity (stretch & rebound), strong adhesiveness and long-lasting durability that will outlast the garment after hundreds of washing & drying.

Dream Flex™ is the ultimate solution for your heat transfer needs that is made from high quality polyurethane for athletic wear, spirit wear, work uniforms & t-shirts where durability is critical and manufactured with STANDARD 100 by OEKO-TEX® Certification.

**Colors in stock (29)**

**Available Sizes:**  
Width: 20" Rolls  
Lengths: 5yd (15ft), 10yd(30ft) , 27yd(81ft)

**Pressure:**  
Medium Pressure

**Application Time:**  
8-12 seconds

**Thickness:**  
90 microns/3.5 mils thickness

**Fabrics:**  
Cotton, Poly, Blends, Polyester/Acrylic Blends

**Blade:**  
45° Blade Recommended

**Peel:**  
Hot, Warm Peel

**Temperature:**  
284°F-302°F

Test one piece of fabric for materials made of 100% polyester or moisture-wicking polyesters. Use rubbing alcohol on moisture-wicking polyesters before pressing to ensure adhesion. Dye migration may occur with low energy dyes in polyester and poly-blend materials. Due to the manufacturing process, slight color variation is possible.
